

## HEAVY RAINFALL ALERT

 **Urgency:** Expected       **Severity:** Moderate  
 **Certainty:** Likely

**Issued:**

Mon 09 Dec 2024  
4:47 PM

**Effective:**

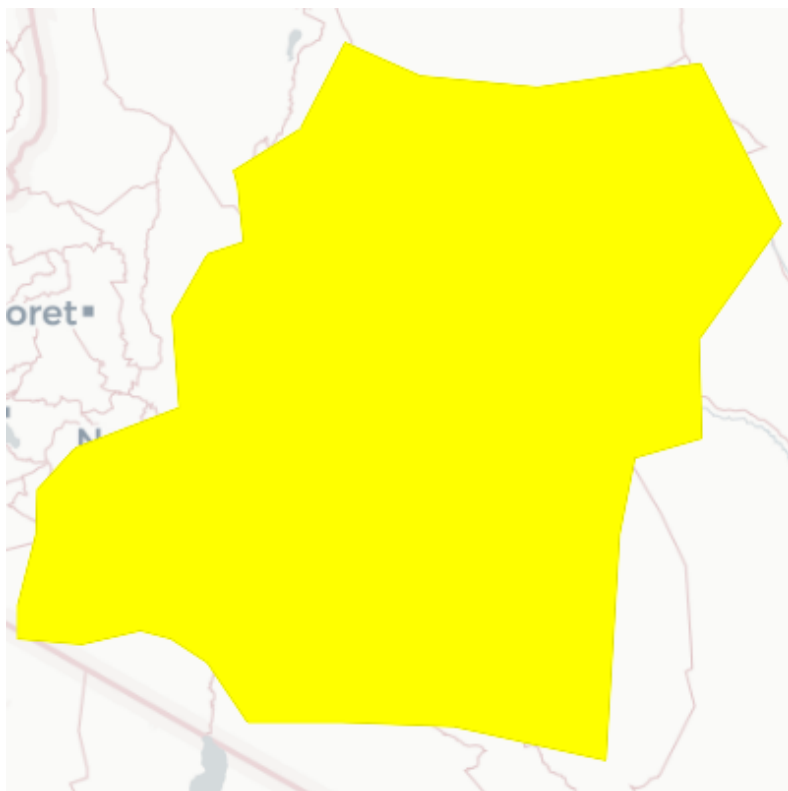

Fri 13 Dec 2024  
3 PM

**Onset:**

Sat 14 Dec 2024  
3 PM

**Expires:**

Sun 15 Dec 2024  
9 PM

**Area:**

Meru, Embu, Tharaka Nithi, Kirinyaga, Murang'a, Nyeri, Kiambu, Nyandarua, Laikipia, Isiolo, Nakuru, Kericho, Bomet, Narok, parts of Kajiado, Nairobi, Machakos, Kitui and Makueni.

**Description:**

Rainfall of more than 20mm in 24hrs is expected from Thursday 14th November, 2024 in parts of Central Rift valley, Central including Nairobi area and southeast lowlands. The rainfall is likely to intensify to more than 30mm in 24hrs on Friday 15th November, 2024 over Southeastern lowlands and central parts including Nairobi area. It is projected to reduce in intensity from 16th November, 2024 over most parts of the country.

**Instruction:**

Residents in all the mentioned areas are advised to be on the lookout for potential flash floods. People leaving downstream rivers and along seasonal rivers should be careful

since water may appear suddenly even though it may not be raining within the area. Residents are advised to avoid driving through, or walking in moving water or open fields and not to shelter under trees and near gridded windows to minimize exposure to lightning strikes. People in landslide prone areas especially over the slopes of the Aberdare ranges, Mt. Kenya and other hilly areas should be vigilant. Updates will be provided promptly if there are any changes.
